REHS Strategic Planning Process

November 2000 → January 2001 → July 2002 → October 2002

The information from the recent REHS survey is being used as a key input in shaping the REHS program direction for the future. The information will be used as the basis for the identification of key issues, strategic initiatives and annual objectives in the 2002-2006 strategic plan. Over the next several months, the Stakeholder Team will meet and:

- Attempt to reach consensus on at least six key issues facing the REHS Program over the next five years.
- Develop strategic initiatives that will assist the REHS Program in addressing those key issues.
- Develop short-term objectives that will ensure that REHS resources are focused on addressing the key issues.
- Develop the preliminary strategic plan and produce a final document in 30-60 days.
